The 6-session course is priced at 5× the single-session rate — one session free — the industry-standard incentive to sell the full protocol up front. Full Body is priced as a bundle rather than a strict multiple. This grid applies to both Lasera and Leaseir.

IPL Skin Rejuvenation

STELLA — INTENSE PULSED LIGHT

Photofacial pricing — single session and full course.

TREATMENT	SESSIONS	PRICE	EFFECTIVE / SESSION
IPL Skin Rejuvenation	1 session	\$250	\$250
IPL Skin Rejuvenation — course	4 to 6 sessions	\$1,000	\$167 – \$250

TREATS

- Hyperpigmentation & sun damage
- Redness & diffuse erythema
- Rosacea, couperose, spider veins
- Fine lines & superficial wrinkles
- Skin texture & enlarged pores
- Loss of radiance & dull complexion

PROTOCOL & POSITIONING

A course of **4 to 6 sessions** spaced **3 to 4 weeks** apart, followed by **1 to 2 maintenance sessions per year**.

IPL is the highest-frequency rejuvenation service on a med-spa menu — short chair time, no downtime, and a client base that returns on a seasonal cycle. Quote the **course, not the session**: the course price is what turns a one-off consultation into a year-long client.

The Stella handpiece also performs hair removal — price those areas from the **Laser Hair Removal** grid on the previous page.

At 4 sessions the \$1,000 course carries no discount against the single-session rate; at 6 sessions it represents a 33% discount. **Fix the session count at the consultation** so the effective rate is known before the course is sold.

Tattoo removal, pigmented lesions and carbon peel — per-session pricing and suggested courses.

Per-session pricing

SERVICE	OPTION	PER SESSION
Tattoo removal	Extra small (≤ 2 in ²)	\$125
	Small (2–4 in ²)	\$175
	Medium (4–8 in ²)	\$275
	Large (8–20 in ²)	\$450
	Extra large (20+ in ²)	from \$600
Pigmentation	Single spot / a few spots	\$95
	Small area (hand, cluster)	\$165
	Full face / large area	\$325
Carbon (Hollywood) peel	Single peel	\$150

Extra-large tattoos (20+ in²) are quoted per case after consultation. Tattoo removal typically requires 6–10 sessions depending on ink density, color and depth — quote the course, not the session.

Two service tiers from one device — a light fractional pass sold as a series, and a deep resurfacing pass sold single-session.

TREATS

- Fat cell reduction & contouring
- Face rejuvenation & dermal volume
- Skin firmness & laxity
- Lymphatic drainage
- Vessel wall repair

PROTOCOL & POSITIONING

Every package is priced at **5×** the single treatment — the sixth session is free, a 16.7% client saving across the range.

CellSound is a **course-only service**: results accumulate across the protocol, so the single-treatment price exists mainly to anchor the package against it. Sell the package of 6 as the standard entry point and keep the single treatment as a trial or maintenance visit.

Two or more body areas carry a **\$260 premium** over one area — a 36% uplift for broadly the same chair time.

Consultation pricing and the first-year revenue model for a solo practice.

Consultation pricing

SERVICE	DETAIL	PRICE
Initial skin & hair analysis	Full 19-criteria report in 2D and 3D	\$50
Follow-up analysis	Progress comparison, billed with each facial	\$25
Annual value per client	Initial analysis + 8 follow-ups (6–10 facials per year)	\$250

First-year revenue model

REVENUE STREAM 1

Analysis revenue

30 facial clients per month at \$250 per client per year in skin consultation alone — \$50 up front plus \$25 with every facial.

\$7,500

REVENUE STREAM 2

Retail product sales

Retail conversion in spas runs 20–25% of facial clients. At a conservative 20% — 6 clients per month — and a \$50 average purchase.

\$3,600

REVENUE STREAM 3

New client attraction

The analyzer is a visible differentiator. Assuming 5 new facial clients per month from Month 2 onward, pro-rated as each cohort joins mid-year.

\$7,500

Theoretical profitability
over the first 12 months

\$18,600

Assumptions. A solo esthetician in the US sees roughly 60 clients per month, about half of them for facials — 30 facial clients is the basis of this model. Figures go up significantly for an established spa with a broader service menu, where the analyzer creates more packages and more synergy between services.
